## **Bush and Howard are on the offensive.**

Their aggressive domestic and foreign policies promote the wealth and power of a few while actively suppressing alternatives to neoliberalism, corporate-led globalisation and war. The 'war on terror', attacks on workers and students, the environment and human rights have stimulated responses from civil societies around the world including Australia, the USA and the Philippines. Where are we as a progressive force and where have we got to go in order to start to turn the tide?
